JULY 2020

CASKET

The Receptacle where Human Remains are placed and/or viewed before final disposition. Usually made of steel or wood.

PROTECTIVE

Steel, Copper and Bronze Caskets which have an internal locking mechanism, which retards the entrance of any air and / or water.

NON-PROTECTIVE The basic steel casket without the internal locking mechanism.

BURIAL VAULT

The outer enclosure for Earth Burial. Can be made of Concrete, Steel, Fiberglass and Plastic Components. Burial Vaults add Stability to the gravesite and protect the casket. Some Cemeteries require a Burial Vault.

EMBALMING

The scientific process used on a deceased person, which disinfects and preserves the remains. The proteins of the body are denatured which stops decomposition. Embalming restores a natural look to the body for viewing and funeral purposes.

URN

The Receptacle which holds cremated Human Remains. Usually made of Bronze, Fiberglass, Wood or Ceramic.

CREMATION

The process whereby the Human Remains are reduced to ashes and bone fragments by intense heat. The retort is a specially designed furnace for the purpose of Cremation. It is chosen as an alternative to earth burial.

STATEMENT OF FUNERAL GOODS AND SERVICES SELECTED

(This is not a bill)

Charges are only for those items that are used. If we are required by law to use any items, we will explain in writing below. If you selected a funeral, which required embalming, such as a funeral with a viewing, you may have to pay for embalming. You do not have to pay for embalming you did not approve if you selected arrangements such as a direct cremation or immediate burial. If we charge for embalming, we will explain why below:

Law does not require that you buy a container to surround the casket in the grave. However, many cemeteries require that you have such a container so that the grave will not sink in. Either a grave liner or a burial vault will satisfy these requirements.
